## Septic Conversion Incentive Pilot Program

#### What is this program about?

- LOTT is offering a rebate of 50% of the LOTT connection fee to property owners converting from an existing on-site septic system to the LOTT wastewater system.
- Property owners converting from septic to sewer who meet the criteria for hardship status (Lifeline or other) may qualify for an additional rebate of 25% of the LOTT connection fee.

#### How long will this incentive be available?

This is a temporary pilot program for 2017 and 2018. Funding is limited and is available on a first-come, first-serve basis. The program is subject to available funding and may be discontinued at any time.

#### How does the program work?

- Complete the application form on the reverse of this flyer and submit it to the city Lacey, Olympia, or Tumwater that will be providing utility services to the property that is being converted from septic to sewer.
- City and LOTT staff will review the application, determine rebate eligibility, and send you notification of the rebate amount.
- At the time of payment to the city for charges related to connection to the sewer system, you will receive the
  rebate as an "instant" rebate off the cost of the LOTT connection fee. You will be responsible for payment of
  the remaining portion of the LOTT connection fee not covered by the pre-approved rebate, along with other
  applicable city permit and connection fees.

### Why is LOTT offering this pilot incentive program?

These rebates are being provided as an incentive to encourage property owners within LOTT's service area to abandon on-site septic systems and connect to the public sewer system. This benefits LOTT and the community by:

- Helping protect water quality of local groundwater, lakes, streams, and inlets.
- Protecting LOTT's continued ability to discharge to receiving waters.
- Spreading the cost of operating the public sewer system over more ratepayers, helping lower costs for all.
- Gathering data that can help guide future efforts to encourage septic to sewer conversion.

#### Who should I contact for more information?

Contact the city that will be providing utility services for the property site that is being converted from septic to sewer.

Lacey Public Works (360) 491-5600

Olympia Public Works Diane Utter, Water Resources Engineer (360) 753-8562, dutter@ci.olympia.wa.us
