Demolition of Building on Washington Street

A construction project to demolish the building and make property improvements at 516 Washington Street is scheduled to begin Monday, February 10, 2020. Together with construction contractor Road Construction Northwest Inc., LOTT is removing the building, paving the site, and improving the sidewalks. Work is scheduled to start Monday, February 10, 2020 and is expected to be completed by August 2020. However, as with all construction projects, weather or other unexpected delays could change the schedule of this project.

Contractors will be working at the site Monday through Friday, 7:00 a.m. to 5:00 p.m. During work hours, there will be increased truck traffic, noise, and traffic control when needed. Parking spaces on the eastside of Washington Street between A and B Streets will be unavailable during the project to install new sidewalk and parking features.

The construction project includes demolishing the existing derelict building. Work will also include paving the property and installing permanent fencing, new sidewalk, and driveways. After project completion, the site will be used primarily for contractor staging for construction projects within the Budd Inlet Treatment Plant. Eventually, the site will be used for expansion of wastewater treatment processes.

For More Information

- If you have questions or concerns about the overall project, please contact Joanne Lind, LOTT’s Public Communications Manager, at 360-528-5772.
- If you have questions or concerns about active construction activities, contact the LOTT Construction Manager, Michelle Barnett, at 360-528-5709.
